

BUILD YOUR OWN FAIRY GARDEN

Supplies

Container- an old birdbath or a simple saucer, find creative possibilities!

Pea Gravel- a necessity if your container does not have drain holes. Also makes a perfect top dressing.

Potting Mix- use good quality Family Tree Nursery Potting Mix. Use enough to really mound it up in your container.

Plants- plants suited for terrariums work well. A basic arrangement of one low creeper, one mid-size plant and one upright, taller plant is a good starting point for a 10" saucer.

Accessories- do not forget the fun stuff! Use extras like arbors, benches, and fairies.

Planting

1. Spread about an inch of gravel in container.
2. Add soil.
3. Pull plants out of their pots and tease roots. Press into soil.
4. Top dress with pebbles and fill in with gravel if desired.
5. Add design elements.

Care

Indoors, place the garden in medium to bright, indirect light. Allow to dry slightly between waterings.

Outdoors, place the garden in a shady and somewhat protected spot. Light watering daily during summer works the best.

Plant List

Baby Tears

Aluminum Plant

Fittonia

Selaginella

Wire Vine

Spider Plant

Ferns

Creeping Fig

Hypoestes

African Violets

Neanthe Bell Palm

Purple Heart

This is just a starter list, experiment with what appeals to you!
